

The PHP Classes site

gives the present

CERTIFICATE

to

RAFA RODRIGUEZ

For having ranked Number #6
in the edition of January, 2024 of the

PHP Innovation Award

for the PHP package

Div PHP Matrix Library

Nomination reason: A matrix data type can store many values, like a table. Several types of applications need to perform operations on data stored in a matrix. This package can perform several operations in a matrix and output the resulting matrix in several formats like CSV, XML, JSON, HTML table, Markdown, YAML, and SQL. This way, this package can be used by applications that need to convert matrix data to a format that other applications can use.
